

Advanced POTS Replacement Service

The best VoIP solution to facilitate critical analog services.

The SolEx Advanced POTS Replacement Service provides everything you need to deliver peace of mind for critical analog applications.

Whether its an Alarm line, an Elevator line or something else, the SolEx Advanced Analog POTS Replacement options provide you with peace of mind knowing that if the critical service is needed, its ready to respond. Using rugged hardware with custom battery backup options to suit your needs, and single, dual, or even multi-e-SIM support, you can be sure that even if your power and/or primary connections fail, the service will still function and provide the critical services required.

Additionally, with access to technicians certified to work on fire alarm boards and comprehensive post installation testing with your fire alarm company, you can be sure that the service is not just installed, but working to the satisfaction of your emergency provider.

Others may offer POTS solutions but SolEx goes further and provides tailored solutions to suit you specific scenario. Contact us now to learn more.
